

FEATURES

ONEIROGRAFIA

1

→ Choose a language (POR/ESP/ENG)

2

→ Welcome poem (POR ou ESP ou ENG)

3

→ Fill the form (POR ou ESP ou ENG)

4

→ Oracle (POR ou ESP ou ENG)

Combinatory poem created from word lists.

This step will not be in the demo, and will be ready only in the final version of the program..

5

→ Choose between dream or nightmare (POR ou ESP ou ENG)

6

→ Immersion in dream or nightmare environments

The user will navigate a dreamlike environment like a desert using the mouse, changing the point of view. The user needs to click on the iris of the eye (nightmare) or the corolla of the sunflower (dream) - elements that are distant on the horizon - to be taken to another environment.

7

→ Choosing words in a database

Here the user will be inside a globe and the words in the list will be here. When choosing 3 or 4 of them, it will leave here and take you to the last navigation step.

8

→ Dream postcards

The user will exit navigation mode (mouse-clicked point of view) and return to the click system. A postcard with a mixture of 3 or 4 photos / filters in the background, and with one of the phrases on the form will be created. The user can reload the art and receive a new one or share his postcard on social networks.
